Glasses Inside!*

Fun In Minnesota!

Enjoy the Benefits of Boat Ownership *at a fraction of the cost!*

Excel Boat Club Members have access to a million-dollar fleet of boats on Lake Minnetonka and the St. Croix River!

Minnesota's Excel Boat Club is designed for people who enjoy boating but don't want to be boat owners. Club members enjoy affordable luxury boating with access to a million-dollar fleet of boats. Members can select from a variety of watercraft depending on the occasion. From fishing, tubing or skiing to entertaining out-of-town guest. The Club is known for its exceptional customer service with a friendly, professional staff. Daily rental options are also available with the Boat Club earning honors as "Best Rental Facility" on Lake Minnetonka by readers of Navigator magazine. A privately-owned

company, Excel Boat Club has two marina locations: Lake Minnetonka in Excelsior and the St. Croix River in Bayport, which is designated as a National Scenic Waterway.

The Boat Club's marinas provide easy access. The location on the St. Croix River means no fighting with downtown Stillwater traffic to get to the docks. At Lake Minnetonka, the marina is located on the outskirts of Excelsior just off Highway 7.

EasyBloom Plant Sensor

The EasyBloom Plant Sensor helps you grow a perfect garden without all of the guesswork. If you've ever wondered, "Is this corner too hot, too dark, or too dry?", EasyBloom is for you.

This ingenious in-ground sensor reads and analyzes growing conditions in specific spots inside your home or in your yard. After a minimum of 24 hours, you just plug it into your computer USB port and watch as it turns readings into recommendations, listing plants sure to flourish in your exact environment.

EasyBloom puts expert plant help in the palm of your hand:

- Access the EasyBloom database of 5,000+ plants
- End the discouraging cycle of trial-and-error planting
- Diagnose ailing plants and bring them back to health
- Keep inventory of your own plants for one-click plant care
